

Overview

The SimplyNotify module allows you to setup notifications, such as missed wakeup calls, for the hotel.

The screenshot shows a table with the following columns: ID, Name, Module, Notification URL, Notification Enable, CreatedAt, and Action. A single row is visible with ID 1, Name 'Missed Wake Up Call', Module 'SimplyWake', Notification Enable 'Yes', and an Action dropdown menu. A 'Create New' button is in the top right, and a search bar is below it. A pagination bar at the bottom shows 'Total 1 items / page'.

ID	Name	Module	Notification URL	Notification Enable	CreatedAt	Action
1	Missed Wake Up Call	SimplyWake		Yes		Action

1. **Create New** - Create new notification alert
2. Currently set notification modules
3. Notifications Enable - Indicates if notification module is enabled or not
4. **Actions** - Action allows you to modify, view or delete a notification

Create New Notification

The form is titled 'Add Module Operator' and contains the following fields: 'Name' (text input), 'Module' (dropdown menu with 'Please Select'), 'Notification URL' (text input), and 'Enabled' (radio buttons for 'Yes' and 'No'). A 'Submit' button is at the bottom.

Name

Module

Notification URL

Enabled
